

I spent six semesters as a TA for an introductory physics course at the Colorado School of Mines. At the end of every semester, all students had the opportunity to anonymously write a review of my performance as a teaching assistant. Here are all of the submissions I have ever received.

I appreciate how thoroughly Nick explains and works through problems when people have questions.

Great T/A

N/A

The best

Very concise and helpful, always really clear about whether or not you're on the right track. So helpful, needs a raise.

Nick, you explain the answers well, but can fall victim to tunnel-vision sometimes on problems or people.

Great TA, you know what is happening and can easily explain the topics when help is needed.

Explains very well and gives our group words of encouragement

Good explanations. good person. overall 10/10 would learn from you again.

Good explanations, good person, overall 10/10 would learn from you again.

Great help with questions, helps go through mathematic processes to solve problems.

Super good at explaining concepts clearly to us when we need help in studio.

Very straightforward and to the point, great TA

love, keep doing you

Super great TA, I like when the TAs join the zoom and annotate the screen.

Amazing TA!!! He is so helpful and the review sessions are informative and include relevant examples.

Very helpful. Knows the material well.

I have yet to hear a physics joke from Nick. But everytime I've asked him questions, he is always super helpful. Very quiet though.

Explains things pretty well, sometimes with too much detail.

always comes in clutch whenever i need help in studio (also love the mini-whiteboard)

Know you're going to explain whatever topic well so we understand it well

Very helpful at explaining difficult concepts and getting my group past roadblocks

Great at explaining

He does great putting together review sessions and really knows what hes talking about. Sometimes he skimms over things too quickly but has gotten better at this

I really appreciate the review sessions, thank you so much.

The BEST TA! So smart.

You were my favorite TA! You always explained things very well and I always understood what to do once you left. You were always very nice and made sure we all got what you were saying before you left

Nick is a very steady and patient person. He always takes his time explaining a problem to a student instead of making assumptions on where or why they are stuck.

## 12 - What aspects of instruction in this course do you find are effective for promoting your learning?

- I think that for remote learning, when the physics department focuses on being as personalized as possible, the course is much more effective.
- N/A
- NA
- The group effort for the studios helped me understand by helping to explain or having it explained. The TAs were incredibly helpful.
- You were really great to interact with for these studios because you took the time to really explain any concepts we weren't understanding and answer any questions we had.
- Review sessions
- Nick is the prime example of excelling as a T.A. in the Physics Department. He carried the team often, given his thorough set of notes for each studio, high intelligence and competence in Physics, ability to lead students through understanding problems, and very obvious self-discipline in holding himself accountable during this difficult time. I would strongly advise that Nick receives a positional upgrade soon, and at the very least, high regard and recognition within the department.

Best TA I've ever had. Always helpful during labs, test review and outside of class. Nick put in A LOT of effort into the class and it clearly showed when asking for help and having him explain a concept to you.

Comments: Mistook our desperate plea for help as a dance move. :/ (2-hand raise)

Nikolai Kostin (White polo boi w/ glasses)

1    2    3    4    5    6    7    8    9    10

Comments: He is respectful towards students and seems like he understands the physics, but sometimes does not really give an explanation when we ask a question, but rather just gives us the answer. Also, he seems a little hesitant when answering questions, which can make us confused or unsure.

Comments:

cool whiteboard, nice how he always says "good job" when he's done explaining something even if our group has no clue what's going on
